

## **WEF assists Walton PTO in funding Science & Language Arts programs**

Congratulations to Walton PTO President Kim Hartman! As part of WEF's 2009-2010 grant program, she received financial assistance to help sponsor enrichment programs by the Museum of Science and author/illustrator David Biedrzycki to all of the Walton Elementary School students. The Museum of Science presented the "Animal Habitats" program to grades K-2 and "Motion: Forces & Work" to grades 3 and 4. David Biedrzycki took the subjects of writing and illustrating to another level, describing how artwork created on a computer has given him ideas for his children's books. This event exposed all Walton students to an exciting mix of science, technology and language arts in a rich and interactive environment!
