

WEF awards grant to WHS' Rachael Barron for EduWebLabs Science Program

Congratulations to Wakefield High School staff member Rachael Barron! Wakefield Educational Foundation (WEF) recently delivered a check to Ms. Barron that will benefit approximately 800 WHS Science students as part of WEF's 2010 Grant Program. EduWebLabs, an educational program that provides students with meaningful laboratory investigations in a variety of scientific disciplines, will allow students to utilize laboratory equipment, observe results and perform statistical analysis of these results. The labs align with many WHS science curricula including biology, anatomy and physiology, chemistry and physics. These labs are done online with an individual student password, allowing each student to submit results via email for the teacher to grade.
