

WEF provides funding for visual communication teaching tool at Woodville School

WEF also delivered a \$399 grant to Woodville School staff member Christine Nelson to purchase Boardmaker Version 6 to benefit all students who require visuals for communication.

Staff will develop materials to augment receptive and expressive communication by developing schedule boards, specialist schedules, choices, social stories and lesson plans for non-verbal students. Progress can be measured by the number of times visuals are used both functionally and academically.
